PROFILE

I'm a versatile Software Engineer with expertise in React.js, Next.js, JavaScript, CSS, and HTML. I specialize in Front-End, creating exceptional UI/UX experiences. I also have hands-on experience in back-end development. My skills also extend to graphic design, allowing me to deliver innovative solutions for user-centric applications.

EXPERIENCES

● Software Engineer

Frazer Computing, LLC (Apr 2022 - Present)

- Developed and maintained various applications to enhance operational efficiency for the company and clients.
- Spearheaded a modernized rewrite of the main Frazer website using Next.js, resulting in improved performance and user experience.
- Created and managed the Frazer Dealer Portal, a React.js-based account dashboard/portal for dealers, enabling them to manage their accounts, subscriptions, and payment methods effectively.
- Developed an internal helpdesk tooling replacement for CSRs using Tauri (React.js and Rust).
- Contributed to team projects by completing tasks in Go and Clarion.

● Front-end Engineer

Frazer Computing, LLC (Oct 2019 – Apr 2022)

- Developed dynamic frontend applications using React.js, Cascading Style Sheets (CSS), Bootstrap, and JavaScript frameworks.
- Utilized Adobe Photoshop/Illustrator for UI graphic and logo design tasks.
- Hosted applications on Netlify to ensure reliability and accessibility.
- Completed graphic design / video editing tasks for marketing campaign landing pages.

● Store Manager

GameStop (Oct 2011 – Oct 2019)

- Demonstrated strong leadership skills as a Store Manager in a full-time role.
- Managed day-to-day operations, including sales, inventory, and customer service.
